Delighting You Always

The **Smarter Solution**
for your secure printing needs

Business **Can** be simple

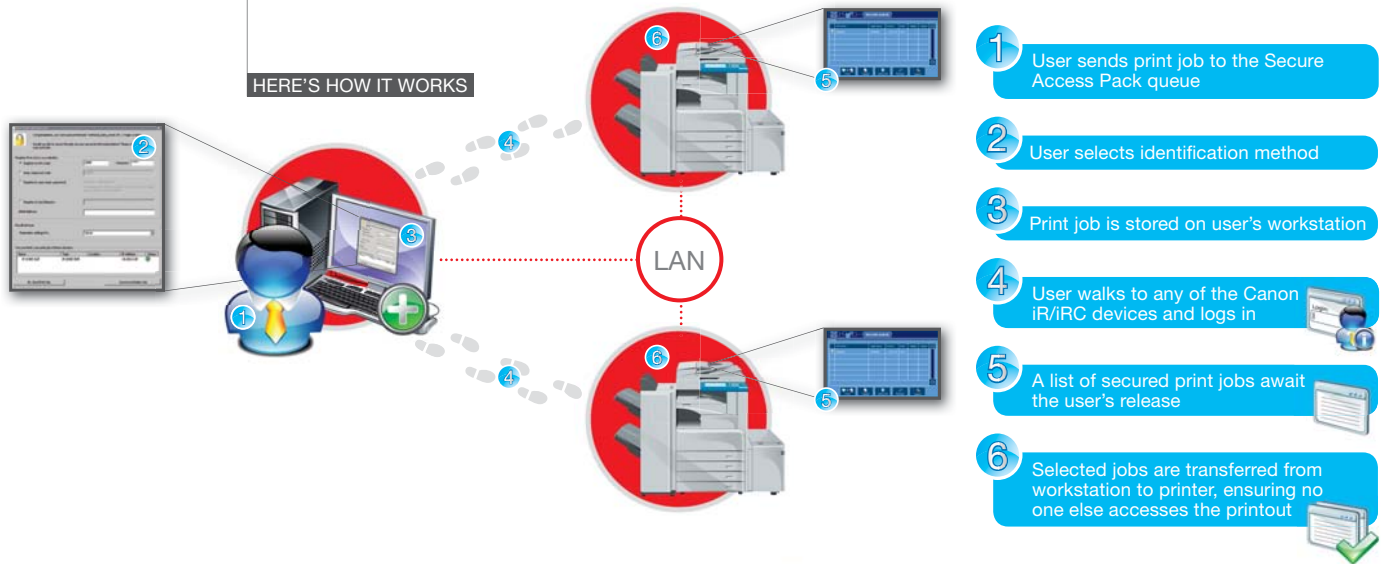

Security and convenience comes together with SECURE ACCESS PACK

Even in small- to middle-sized enterprises, certain documents are more sensitive than others. Payrolls, confidential communications, contracts – all these and more require a higher level of data protection. However, vendors offering secure printing often have oversized solutions that do not fit budget and workflow requirements.

What most companies really need is a solution that is secure, affordable, and non-disruptive.

The Secure Access Pack is designed to provide a convenient, seamless, cost-effective and secure printing process for you.

HERE'S HOW IT WORKS

Why should you use SECURE ACCESS PACK?

My Print Anywhere: The Most Convenient Way to Print

Users can send print jobs from their computers and choose to release them at the Canon iR/iRC of their choice. This allows you to pick up your printout from the nearest iR/iRC, or release them from one that is less busy.

Save The Environment.

With the Secure Access Pack, you will benefit from the reduced paper and toner wastage, as printing is only done upon release confirmation. Lesser misprints means further **cost savings** for you, and a **greener future**.

Machine Security Lockdown

Using the Secure Access Pack, you can lockdown and restrict unauthorized users from scanning or copying at the iR/iRC machines.

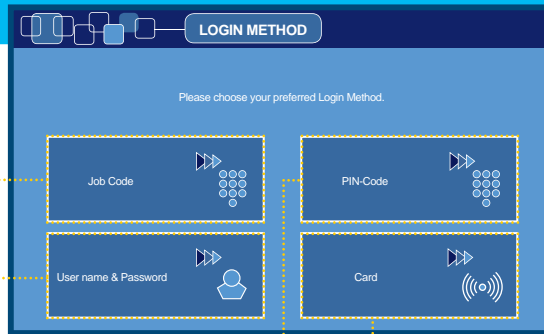

Clever System Architecture

The Secure Access Pack is built upon an innovative **serverless** architecture. This translates to **cost-savings** as you do not need to purchase additional hardware, and thus **no maintenance**. If you have one or more Canon MEAP-enabled iRs/iRCs* in your organization, you are already Secure Access Pack-ready! There is no need to change your business workflow to enjoy the enhancing power of the Secure Access Pack, and it is so **easy to use** it requires virtually no training.

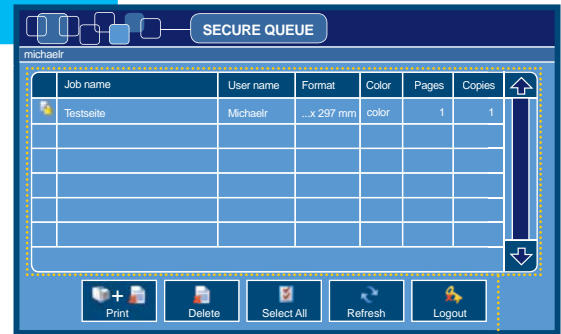

FOUR TYPES OF AUTHENTICATION

The Secure Access Pack lets you decide between 4 authentication modes for that right balance of security and convenience.

Job Code Login allows printing based on a job code defined by the user

Username and Password Login allows printing by a registered user with the right password

PIN-Code Login allows printing based on a secure PIN number

Card Login allows printing based on use of an authorized access pass

Secure Queue: Users will be shown a list of documents they can release for print.

SECURE ACCESS PACK includes:

+ uniFLOW Serverless Secure Printing

+ Secure Access Reader

+ HID Card

Working in tandem with the serverless application, the Secure Access Reader allows you to read a configured HID Card easily and efficiently. All you have to do is to tap the HID Card on the contactless reader and you will be shown your list of documents for print release.

FEATURE READY. FUTURE READY.

The Secure Access Pack is also upgradeable. As your organization grows, your users may require the functionalities that the full-featured uniFLOW Output Manager suite can offer. Please talk to one of our Canon representatives today.
